## The most beautiful gift

Real wood is one of nature's most beautiful gifts. Because we want to share this gift with you in future, we put together our new moderna® parquet product range for you. Each of the different looks show you how moderna® parquet is made from the best wood. The different characteristics are typical and, at the same time, we have reinterpreted them in our way: natural and sustainable, solid and high quality, lively and warm, stylish and modern, sensual and elegant. moderna® parquet is a sophisticated product range that demonstrates love of detail – for people who value real quality, maintain their own personal style, like to make a mark and enjoy timeless aesthetics in combination with comfortable trends. For people who love their homes.

parquet composition

- A Surface**
  - 7 fold sealing with UV-hardened acrylic lacquer
  - 3 fold UV-oiled
  - Oxi oiled (natural oil)
- B Top Layer**
  - Real Wood (2,5 mm – 3,2 mm)
- C Middle Layer**
  - Softwood
- D Bottom layer**
  - Softwood

## Character

### TIMELESS

Combination of timeless elegance and everlasting beauty

### VERSATILE

Large selection of designs with various surfaces

### DURABLE

Top quality with the application of advanced technologies

### HEALTHY

Non-allergic qualities

### ECOLOGICAL

FSC certified wood from sustainable forestry

## Connection

Installation of moderna® parquet is quick and easy. Two systems ensure a lasting interconnection.

The 5Gc system is based on a fold-down principle along the short side. After the boards have been correctly positioned on the long side, simply press down to lock them in – so easy, a child could do it. The short sides and the long sides are interlocked directly and no tools are required. In a nutshell: Position, rotate, click. The 5Gc system (licensed from Välinge) is very stable and guarantees high tensile strength.

With the clic2tap system, you can install your parquet flooring securely in a flash. clic2tap is among the most tried and true connection systems because it makes installation so easy and still meets all of the requirements for a durable, hard-wearing connection.

## In harmony with nature

Home – to each of us, that means within our own four walls. But for all of us together, the environment is our home and we cannot live without it. So those who love their homes must also love the environment. For this reason, at BHK we feel obligated as both people and as a company to do everything we can to preserve our resources and protect our environment. Our moderna® parquet flooring is produced with great care and responsibility towards nature. In selecting materials we make sure that they are natural, demonstrate high quality and are manufactured in an environmentally sustainable manner. Nearly all the woods we use are sourced from sustainable forestry. This is demonstrated by the FSC® certificate on many of our moderna® products. Our basic values are part of our system. For this reason, compliance with environmental guidelines, product quality and work safety in our facilities are audited at regular intervals. Since the year 2000 we have been certified in accordance with ISO 9001 and ISO 14001, and ISO 50001 since 2015. We burn wood and paper waste in our own power plant and use the power generated for our heat and electrical power supply.

Das Zeichen für verantwortungsvolle Waldwirtschaft

# It all depends on the surface

## The right treatment

### VARNISHING

The flooring is sealed with several layers of a UV hardened acrylic varnish. The varnish forms a protective coating and prevents the wood floor from damage such as scratching or cracking.

- Semi-matt varnish accentuates the natural character of the wood floor and the depth of the grain.
- Matt varnish provides a soft, warm appearance.

### PROFESSIONAL LACQUER

- Our multi-layered professional lacquer increased scratch protection and resistance to mechanical damage.
- Wooden floors with professional lacquer are excellently protected against daily wear, spots and against stains.
- This is the most resistant lacquer on the market (7.000 revolutions, using the Taber method according to EN 14354)

### OILS

Oiled surfaces offer a particularly natural look. The oil penetrates into the wood and provides reliable protection from moisture, dirt and scratches. At the same time, the wood surface remains breathable and the wood structure is tangible. The floor retains its high quality, natural, biologically healthy characteristics.

#### UV OIL

- Hardening under UV light
- Satin matt surface finish
- Formaldehyde and solvent free
- Can be refurbished

#### OXY OIL

- Oxidative hardened (air-dried) surface
- Partially easy to repair
- 99% vegetable origin
- Formaldehyde and solvent free

### BEVELLED EDGES

Chamfered wooden floor boards have finely bevelled edges. This allows the boards to appear longer and makes them lighter. The bevel accents the natural look of the floor.

**BRUSHING**

Brushing gives a parquet floor a desired patina – makes them appear aged – as though it had been already used for generations. Of course, it still has all of the advantages of a real wood floor. The brushing treatment emphasizes the natural charm and structure of the wood grain. The floor has a softer, warmer, cosier appearance.

**STEAMING**

The floor is treated with hot steam. This treatment gives it more resistance to fluctuations in temperature and humidity. In addition, the steam changes the colour of the parquet, giving it a decorative touch.

**COLOURING**

Wooden floor boards can be coloured by coating the surfaces with varnishes, coloured oils or high quality stains sealed with varnish. This creates a modern appearance that is no longer standard, but the natural structure of the wood grain remains.

---

## Wood grades

**VINTAGE**

Very rustic, healthy and filled knots of different sizes, cracks, sapwood, silver grains, natural colour differences possible.

**DISTINCTIVE**

A full spectrum of natural features in structure and wood characteristics, various colours and grains, may include healthy, filled knots of various sizes as well as natural differences in colour

**LIVELY**

A wealth of wood characteristics, wooden boards of different colours, various wood patterns, may include healthy, filled, medium-sized knots

# moderna® premium

HARMONIOUS

SOLID

LONG-LASTING

Ready! Steady! Go! moderna® premium is a pre-finished parquet in 3-strip optics for a highly lively effect. This flooring is for people who like to express their individual style and bring it to life in their interior spaces. They recognize and set trends within their own four walls. With moderna® premium, you have 4 different design versions at their disposal. The range of wood species reaches from classic Oak and Beech to trendy Ash – each is accented by the individual treatment and processing of the wood. And because parquet has more lives than one, the surface can always be refurbished based on trends and taste.
